Ohmit Media was founded in 2009 by Tom Ohmit while serving full time as the Technical Arts Director for a non-denominational Christian church in south Orange County. Now relocated, Ohmit Media is helping Christian churches in the Tehachapi and Bakersfield areas to use modern technology effectively to communicate a message of eternal importance.

Our passion is to provide you with creative solutions to reach your audience and increase your impact in our community. Whether you need team training, are looking at upgrading or optimizing your sound, lighting or video system, or need help with your digital public image, Ohmit Media is ready to serve you. With a broad range of skills to offer and a wealth of experience in church application, we hope to become your hometown technology resource.
